PAPERS RELATED WITH THE TESTS PERFORMED IN CEDEX TRACK BOX

Settlement laws of bed layers of a ballast track as determined in 1:1 scale models performed in CEDEX Track Box. José Estaire, Vicente Cuéllar, María Santana, Juan L. Cámara. In preparation

Determination of the critical speed of railway tracks based on static FEM calculations. José Estaire, María Santana & Inés Crespo. In preparation for NUMGE 2018, Porto (Portugal)

Track stiffness in a ballast track fouled with desert sand. Estaire José, Cuéllar Vicente, Santana María. To be submitted to Symposium International GEORAIL 2017 International Symposium

Ensayos de resistencia lateral de vía realizados en el Cajón Ferroviario del CEDEX y su modelización. J. Estaire; V. Cuéllar; M. Santana; J.L. Cámara. Revista Geotecnia. Submitted, 2017

Experimental and numerical evaluation of the effectiveness of a stiff wave barrier in the soil. P. Coulier; V. Cuéllar; G. Degrande; G. Lombaer. Soil Dynamics and Earthquake Engineering, 77, pp. 238-253, 2015.

Short and long term behaviour of high speed lines as determined in 1:1 scale laboratory tests. V. Cuéllar; F. Navarro; M. A. Andreu; J. L. Cámara; F. González; M. Rodríguez; A. Núñez; P. González; J. Navarro; R. Rodríguez. Revista de Ingeniería Civil 165, pp. 91-102, 2012.

Main geotechnical aspects of high speed railways covered by CEDEX and ADIF for the European Supertrack Project. V. Cuéllar, A. Lozano. in Proceedings of the Danube European Conference on Geotechnical Engineering; 2; 847-858; Danube-European conference on geotechnical engineering; Active geotechnical design in infrastructure development by Slovenian Geotechnical Society; 2006.
Alterations in the infrastructure and track due to the circulation of high speed trains. Laboratory tests of a real-scale track section. P. González; E. Romo; J. Manzanas; V. Cuéllar; F. Navarro; M.A. Andreu; P.–E. Gautier. World Congress on Railway Research, Seoul. 18-22 May, 2008.
